The screenshot displays a terminal window and two text editors. The terminal window, titled 'Debian', shows the execution of a TCP client and server program. The client, run as 'tcp_client 127.0.0.1 9000', receives a message from the server and sends a response. The server, run as 'tcp_server 9000 fr.txt', receives the client's message and sends a response. The text editors, 'fr' and 'fw', show the messages received by the client and server respectively.
